rabiadeel12@gmail.com | +92 370 0734805 | Lahore, Pakistan

AI Engineer | Software Engineer

PROFESSIONAL SUMMARY

Recent Computer Science graduate (CGPA 3.57) with hands-on foundations in AI/ML and full-stack software development. Thesis work on an Intelligent Wealth Management System using Reinforcement Learning involved time-series data processing, model training, and evaluation with Python, Scikit-learn, TensorFlow, and PyTorch. Currently applying AI concepts in an industry setting as an AI Engineer Trainee, alongside five deployed production web applications across healthcare and finance. Scored in the 95.3rd percentile in the HEC National Skill Competency Test (NSCT). Eager to grow under experienced AI engineers and contribute to real-world ML solutions.

EDUCATION

B.S. (Hons.) Computer Science — CGPA: 3.57

Sep 2022 – Jul 2026

National University of Modern Languages (NUML), Islamabad

Thesis: Intelligent Wealth Management System Using Reinforcement Learning

HEC National Skill Competency Test (NSCT) — 95.3rd Percentile

F.Sc. Pre-Engineering — Grade A

2020 – 2022

BISE Lahore

WORK EXPERIENCE

AI Engineer Trainee — Stewart Technology & Business Services Pakistan Limited

Jul 2026 – Present

- Working alongside senior AI engineers to support the development, testing, and refinement of AI-driven features within enterprise applications.
- Assisting with data preparation and experimentation for machine learning workflows, applying academic ML/RL foundations in a production engineering environment.
- Collaborating cross-functionally with the AI/R&D and full-stack teams, writing clean, well-documented code aligned with engineering best practices.

Software Developer (AI/ML) — NexoDynamix

Oct 2025 – Mar 2026

- Led development on NexoHealth (ERM & Patient Management) and NexoWealth (AI-based Asset/Wealth Management) platforms.
- Utilized machine learning models and data-processing pipelines to build real-world intelligent systems.
- Collaborated cross-functionally to deliver scalable, compliance-aware healthcare and finance solutions.

MERN Stack Intern — Soplex Technologies

Jul 2025 – Sep 2025

- Built scalable, data-driven full-stack applications using MongoDB, Express.js, React, and Node.js.
- Designed and integrated RESTful APIs in an agile environment with a focus on performance and structured system design.

PROJECTS

Intelligent Wealth Management (iWM) <https://iwmhub.com/>

- Smart personal finance system with real-time asset tracking, expense categorization, and intelligent portfolio insights.
- Built with React, Firebase, and Tailwind CSS; features dynamic dashboards, data visualization, and automated data handling.

NexoHealth — Enterprise Resource & Patient Management <https://health.nexodynamix.com/>

- Core AI-driven ERM module for healthcare: optimized patient scheduling, resource allocation, and large-scale sensitive data handling.
- Integrated complex backend logic to maintain regulatory compliance across workflows.

Mafazat ul Hayat — Hospital Management System & Patient Portal <https://mafazatulhayat.com/>

- Full-stack CMS for a non-profit hospital with 12 admin modules (doctors, appointments, lab reports, careers, media gallery, blog, and more).
- Role-based auth (admin/patient) with a patient portal; private S3 file storage with automatic image compression and presigned URL caching.

SehatX — Healthcare Information Website <https://sehatx.com/>

- Comprehensive healthcare platform with educational content, medical resources, and a full admin-controlled CMS built with React + Vite and Firebase.

TECHNICAL SKILLS

AI / ML	Python, Scikit-learn, TensorFlow, PyTorch, Reinforcement Learning, Time-Series Data, Model Training & Evaluation, Data Processing
Languages	JavaScript, TypeScript, Python, SQL
Frontend	React.js, Tailwind CSS, Vite, Chart.js, HTML/CSS
Backend	Node.js, Express.js, RESTful APIs
Databases	MongoDB, Firestore, Firebase Realtime DB, Supabase
Tools	Git, GitHub, Postman, Figma
Concepts	State Management (Hooks, Context API), Authentication, API Integration, Agile/Scrum

LEADERSHIP & CO-CURRICULAR ACTIVITIES

Vice President — ACM NUML Lahore Chapter

Organised technical workshops, coding events, and industry–academia engagement sessions.

Core Team Member — Google Developer Student Clubs (GDSC) NUML Lahore

Planned and executed tech events, community meetups, and hands-on software development sessions.
